## Business Services

Businesses needing attractive store fronts with large-pane glass displays can call the *Glass Doctor* whenever the glass needs original installation, repair or replacement. From emergency board-up service to advance measurement plans, *Glass Doctor* has unique services to exceed business customers' expectations. We can repair, replace or install:

- Store fronts
- Mirrors
- Display cases
- Glass walls
- Mail slots
- Safety and fire-rated glass
- Bullet and bomb resistant glass
- Package doors
- Entry door hardware
- Panic hardware
- Energy efficient, insulated glass
- Reflective or tinted glass
- Scratch removal

*Glass Doctor* **Emergency Service** is offered for businesses 24 hours a day, seven days a week. Emergency service includes boarding up exposed windows and doors after they have been damaged and taking measurements for replacement glass. If Glass Doctor has the correct glass in stock, it can be cut to fit either at our shop or at your business with our mobile glass shop on wheels. Often, replacement glass can be delivered and installed within two days, depending upon availability.

The **Advance Measurement System** helps businesses prepare for when their glass will break, not if their glass might break. First a *Glass Doctor* service technician determines the types of glass in an apartment complex, hotel, office building, retail establishment or other business. Next, the technician measures the glass that would be needed in case of breakage. The glass types and measurements are kept on file at the *Glass Doctor* shop. If there is a breakage, the customer simply calls the *Glass Doctor* franchise, explains which glass needs to be replaced, and the glass is ordered immediately. In some cases the glass may be in stock and may only need to be cut to fit. Advance Measurement saves the time of the initial assessment service call and ensures measurement accuracy. Businesses can incorporate Advance Measurement and Emergency Service into their disaster recovery strategy plans.
